

Q4 2024 Regional Performance Report

Executive Summary

In Q4 2024, North India experienced a significant decline in sales performance compared to the previous quarter. This report investigates the root causes and provides recommendations for recovery in Q1 2025.

Key Findings

- Distributor Disruption:** Our primary logistics partner in North India, Sharma Logistics, faced a warehouse relocation in October 2024, causing stock shortages for nearly three weeks.
- Competitor Activity:** A regional competitor launched an aggressive discount campaign in November 2024, offering 20% off on similar electronics products, which pulled price-sensitive customers away from our stores.
- Reduced Marketing Spend:** The North India marketing budget was cut by 15% in Q4 2024 as part of a company-wide cost optimization initiative, resulting in lower foot traffic and online ad visibility.

Recommendations

We recommend restoring the North India marketing budget to Q3 levels, renegotiating terms with Sharma Logistics to include penalty clauses for future disruptions, and launching a counter-promotion in Q1 2025 to win back price-sensitive customers.
